CONTINGENCY MEASURES TAKEN BY KELIN REGARDING COVID-19

In light of the government directives aimed at minimizing the spread of the COVID-19 virus, KELIN has taken the following measures to ensure the safety of all our staff, clients, and esteemed stakeholders:

i. Postponement of all scheduled activities that may affect shared predetermined timelines.

ii. Provision of necessary products to make the workplace safe for any staff who may need to access the office on an urgent basis.

iii. Observance of all government directives around safety regulations during this period, while promoting positive messaging.

With effect from Tuesday, 17th March 2020, we suspended all scheduled stakeholder engagements and other activities. This suspension will stay in place until the spread of the virus is contained and is duly guided by the relevant government entities.

In this regard, KELIN offices remain closed to our stakeholders so as to ensure we minimize contact and reduce the risk of infection to our teams; who will work virtually during this period.

We continue to monitor the government response and provide guidance to ensure a rights based approach is taken; building on our HIV & TB experience. Please reach us via email on info@kelinkenya.org and 254710261408 in case of urgent queries related to our scope of work.

Your health and safety remain our concern and we are hopeful the situation will be contained soon. We are keen to resume operations and to continue our work in advocating for health rights, reclaiming human rights, and rebuilding lives.

In the meantime, we urge you to continue observing the recommended health practices both for yourself and loved ones; wash your hands regularly using soap and water or alcohol-based sanitizers, avoid touching your face, observe social distancing, avoid social gatherings, and stay hydrated.

Should you experience a fever or a dry throat leading to a cough, kindly call the Ministry of Health hotline for immediate assistance on 254729 471414 or 254732 353535. For more information about COVID-19 you are encouraged to call 719 or dial *719#.
