**AFFIDAVIT**

I DR. KHISA WESTON WAKASIKA of P.O Box 19460-00202 Nairobi and a resident of Nairobi in the Republic of Kenya do swear on oath and state as follows;

1. **THAT** I am a consultant obstetrician/gynecologist in public and private practice. I am a qualified and experienced fistula surgeon of repute with key competencies in the practice of Fistula Surgery, Obstetrics, Gynecology, STI, HIV & AIDS and a lead researcher in women's health. I am based at Hurlingham Family Health Clinic. I am also employed as an Obstetrician and Fistula Surgeon at Kenyatta National Hospital where I

provide technical support in fistula programs across Africa as well as organizing and executing reproductive health programs for the last 25 years.

2. **THAT** I hold a Bachelors of Science degree in medicine (MB. Ch.B) and a Masters in medicine in Med Obs/Gynae from the University of Nairobi. I am currently a PhD candidate at the University of Manchester, UK focusing on Pelvic Floor surgery. I attach herewith my CV and mark it as **KK1 (a)**.
  
3. **THAT** I have also attached herewith the license to practice medicine for the year 2013 and 2014 and mark them as **KK1 (b)** respectively when I undertook the medical procedures and examination subject of this petition. I have also attached my current medical licence and mark the same as **KK1 (b)**.
  
4. **THAT** on or about 22 August 2013, at my clinic - Hurlingham Family Health Clinic, I received a patient by the name SWK (for the purposes of these proceedings), a 40 year old woman at that time. She informed me she was seeking information on a medical procedure known as bilateral tubal ligation (BTL). She also informed me she had been referred to me by an organization known as African Gender and Media Initiative Trust (GEM). I informed her BTL was a family planning method that was permanent and therefore cannot be reversed. She then sought to confirm whether the same had been done on her allegedly by Pumwani Maternity Hospital during her last caesarean delivery sometimes in 2010 without her

informed consent. During that procedure, she claimed to have consented to the caesarean delivery only and not BTL.

5. THAT I booked her for theatre at Upper Hill Medical Center where I have admission rights. The procedure of the nature of a diagnostic laparoscopy under general anesthesia was undertaken on 24 August 2013.
6. THAT the procedure revealed slightly bulky but normal uterus and ovaries. Both fallopian tubes had been ligated at the isthmus/ampulatory region. Dye infiltration was also done and there were no spillage from the fimbrial ends of the tubes. With these findings, I was therefore able to confirm BTL had been done on SWK. I produce and mark "KWW2" a medical report I prepared to that effect.
7. THAT sometimes in October 2014, I received a patient by the name PAK (for the purposes of these proceedings), a 45 year old woman at the time. She informed me she had been referred to me by an organization known as GEM and was seeking information on a surgical procedure known as BTL. I informed her BTL was a family planning method that was permanent and therefore cannot be reversed. She then sought to confirm whether Marie Stopes International had done the same on her allegedly without her informed consent.
8. THAT I undertook physical examination of the patient. I also carried out further medical investigations inform of pelvic ultrasound- TVS adenomyosis and I was able to confirm and conclude BTL was done on

PAK. I produce and mark 'KWW 3' a medical report dated 8 October 2014 that I prepared to that effect.

9. **THAT** sometimes in October 2014, I received a patient by the name GWK (for the purposes of these proceedings), at the time, a 40 year old woman. She informed me she had been referred to me by an organization known as GEM and was seeking information on a surgical procedure known as BTL. I informed her BTL was a family planning method that was permanent and irreversible. She then sought to confirm whether BTL had been done on her allegedly by Pumwani Maternity Hospital during her last delivery through a cesarean section. She claimed she did not consent to the procedure of BTL.
  
10. **THAT** I admitted her for diagnostic laparoscopy. I carried out the procedure and I was able to confirm BTL with no dye spill at laparoscopy and concluded BTL had been done on GWK. I produce and mark 'KWW 5' a medical report dated 8 October 2014 that I prepared to that effect.
  
11. **THAT** sometimes in October 2014, I received a patient by the name AMM (for the purposes of these proceedings), a 35 year old woman at the time. She informed me she had been referred to me by an organization known as GEM and was seeking information on a surgical procedure known as BTL. I informed her BTL was a family planning method that was permanent and irreversible. She then sought to confirm that the same had been done on her allegedly by Marie Stopes International without her informed consent.

12. THAT I admitted her for a diagnostic laparoscopy on 4 September 2014. I was able to confirm previous BTL with no free dye spill at surgery. I concluded BTL was done on AMM. I produce and mark 'KWW 6' a medical report dated 8 October 2014 that I prepared to that effect.

13. THAT I swear this affidavit as an expert on reproductive health programs to help this Court reach an informed conclusion as to whether the 1<sup>st</sup> to the 4<sup>th</sup> Petitioners were indeed sterilized.

14. THAT what is deponed to herein is true to the best of my knowledge, information and belief.

SWORN at NAIROBI by the said )

DR. KHISA WESTON WAKASIKA )

## CURRICULUM VITAE

"KK (9)"  
This is the Exhibit marked.....  
referred to in the Annex of Affidavit of  
Dr Khisa Weston Wakasiaka  
Sworn/Declared before me this... 3<sup>rd</sup> Day of  
February 2017  
Raimon

### Personal Details

---

**Name:** DR. Weston Khisa Wakasiaka, Fistula Surgeon and Obstetrician  
**Address** P. O Box19460-00202, Nairobi  
**Tel. No.** +254-721- 242-347  
**Languages** English, Italian, Kiswahili, Luhya.  
**Date of Birth** March, 1963  
**Nationality** Kenyan  
**Marital Status** Married with Three Children

### Key Attributes

Dr Khisa is a qualified and experienced fistula Surgeon of repute with key competencies in the practice of Fistula Surgery, Obstetrics, Gynaecology, STI/HIV/AIDS and a lead researcher in women health. As a trainer, he teaches both basic and post basic medical students at the university of Nairobi as honorary lecturer. A key instructor in building fistula capacity for young surgeons and paramedics in Africa and beyond. Besides, he holds authorship in several peer reviewed journals. Dr Khisa is hands on in fistula care; this attribute has enabled him restore the dignity of many African women, as well as contribute significantly to the recent Fistula curriculum for Health Care Providers in Kenya. In pursuant of academic excellence, he is currently undertaking part two of his doctorate program at the University of Manchester, UK; focusing on pelvic floor surgery.

### PROFESSIONAL PROFILE

**From July 1991 to date : Employee, Obstetrician and Fistula Surgeon at Kenyatta National Hospital**

#### **Overall objective of the position**

To provide technical support in fistula programs across Africa; a Fistula Surgeon and Trainer, Safe motherhood initiative crusader, operational research specialist, monitoring & evaluation.

#### **I. Specific Roles and Responsibilities**

##### **a) Care of the Fistula Patient, Operational Research, Monitoring and Evaluation**

- ❖ Diagnosis and surgical management of patients presenting with fistula and other gynecological conditions.
- ❖ Lead consultant, trainer and supervisor for fistula and safe motherhood programs.
- ❖ Organizing and execution of reproductive health programs.
- ❖ Creating community networks aimed at destigmatizing the Vesico Vaginal Fistula.
- ❖ Empowering communities to seek and access fistula care as required.
- ❖ Fund raising to meet medical costs for the fistula patient.
- ❖ Data management for the outreach projects including, data collection, cleaning, analyses and interpretation.
- ❖ Provide technical support to different Outreach partners in safe motherhood initiatives in the region.
- ❖ Documentation of project activities of Outreach monthly, quarterly and annual

reports.

#### **b) Project Development**

- ❖ Lead person in development of project concepts and protocols.
- ❖ In Liaison with other Outreach managers, plan, implement and report project activities.
- ❖ Conducting outreach surgical clinics in the region.
- ❖ Conduct supervisory visits to Outreach projects sites as required.
- ❖ Disseminating project reports in regional and international forums.

#### **II Trainer and Supervisor**

This role has a wide scope ranging from class room teaching both basic and post basic medical students to skills transfer for surgeons, paramedics within and outside the region.

- ❖ Develop training curriculum specific to programs and for obstetricians, surgeons, Midwives, undergraduate and graduate medical students.
- ❖ Class room instruction in all matters obstetrics, gynecology and STIs.
- ❖ Curriculum development for fistula care in Kenya.
- ❖ Classroom and clinical teaching for fistula surgeons and paramedics in many African countries.
- ❖ Examination, grading and certification of all cadres trained.
- ❖ Supervision and examination of post graduate students as required by university by laws.

#### **III Medical Practice**

Health care delivery is central to achievement of millennium development goals. To this end, I manage pregnant mothers whenever I have time off fistula work.

##### **Job Responsibilities:**

- ❖ Consultant Obstetrician / gynecologist in public and private practice.
- ❖ Specialist Fistula surgeon and trainer for Africa
- ❖ Consulting fistula surgeon at Kenyatta National Hospital.
- ❖ Honary Lecturer, University of Nairobi, Department of Obs/Gynae
- ❖ Honary Lecturer at Kenya Medical Training College, Department of Clinical Medicine.
- ❖ STI/HIV specialist and Trainer for Kenyatta National Hospital
- ❖ VVF Trainer for Ministry of Health, Kenya and the African region.

#### **III. Academic and Professional Achievements**

---

**2012 to date:** PhD Candidate, The University of Manchester, UK

**2006:** Advanced VVF training [TOT] in Nigeria

**2003:** VVF workshop at Gulu Uganda

**2002:** VVF Training in Nigeria

**2002:** Minimal access surgery at Nairobi Hospital

**2001:** Minimal access surgery at Aga Khan Hospital

**2000:** Post Graduate Diploma in STI, University of Nairobi

**1992:** BTL Training workshop in Nyeri

**1999:** Med Obs/Gynae University of Nairobi

**1994:** Norplant training in Nyeri

**1985:** M.B.Ch.B University of Nairobi.

**1982:** A level, St. Patrick Iteni high School

1978: O level, Kibabii High School

#### IV. Fistula Capacity Building Activities, Planned and Implemented

2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016-On going:

- *(This is an ongoing activity)*. Managing regular Fistula camps in Kenya and in the East African region.
- **From 2005 to date:** Training fistula surgeons, in Kenya, Uganda, Malawi, Sudan and Rwanda.

#### IV Other Work Experience

1994 To date: Medical Specialist, Kenyatta National Hospital

1994 Medical Officer of Health, Africa Air Rescue- Kenya.

## MEDICAL REPORT

**FULL NAME:**

**AGE:** 40 YEARS

**DATE OF BIRTH:** 22/10/1973

**PATIENT NO:** 3562/13

**MARITAL STATUS:** MARRIED

**OCCUPATION:** HOUSE WIFE

**EMAIL ADDRESS:** [tnjoki@gem.or.ke](mailto:tnjoki@gem.or.ke)

**MOBILE:** 0704103452

**RESIDENCE:** MURANG'A

**PARITY:** 4 + with last delivery in 2010. All deliveries were by cesarean section. All the four children are alive and well.

**CONTRACEPTIVE HISTORY:** Had history of bilateral tubal ligation at the time of cesarean section though without informed consent. Had consented only for cesarean delivery.

**PAST MEDICAL HISTORY:** she is sero-reactive to HIV and is currently on HAART with good response.

**ON EXAMINATION:** she was in good general condition not pale, a febrile, and no dehydration.

This is the Exhibit marked "KwW2" referred to in the annexed affidavit of Khisa W. Wakasiaka. Sworn/Declared before me this 20th day of December 2012 at Nairobi.

**UPPER ABDOMEN:** Had a sub umbilical midline scar due to previous section. No masses were felt.

**RESPIRATORY SYSTEM:** grossly normal

**MENTAL STATUS:** Good

**OPERATION:** Diagnostic laparoscopy under general anaesthesia on 24 August 2013 at Upper Hill Medical Center.

**FINDINGS:** Slightly bulky but normal uterus and ovaries.  
Both fallopian tubes had been ligated at the Isthmus/ampullary region.  
Dye infiltration -done, no spillage from the fimbrial ends of the tubes.  
**RECORDINGS TAKEN:** CD attached.

**CONCLUSION:** Confirmed previous history of bilateral tubal ligation  
BTL done.

**REVIEW:** Two (2) weeks later. All ports had healed well.

Yours faithfully,

**DR.KHISA WAKASIKA**

## MEDICAL REPORT

8<sup>th</sup> October, 2014

NAME:

AGE: 40 YEARS

OpNO: 18287/9/14

This is the Exhibit marked "KWW 3"  
referred to in the annexed affidavit of  
Khisa Weston Wakasiaka  
Sworn/Declared before me this 30<sup>th</sup> day of  
December 2014 at Nairobi  
Commissioner for Swearing

### PRESENTATION

Para 4 + 0 seroreactive on HAART with left ovarian cyst and menorrhagia.

### PHYSICAL FINDINGS:

Previous bilateral tubal ligation BTL confirmed with no free dye spill at surgery with an ovary cyst.

### INVESTIGATIONS

CD4 (July) -1411

Pelvic ultrasound-TVS- Moderate adenomyosis with simple right ovarian cystic lesion.

Histology of the cyst wall revealed benign cyst.

### CONCLUSIONS/OUTCOME

Cystectomy done laparoscopically. Confirmed bilateral BTL

**RECOMMENDATIONS:**

This is a permanent method of contraception. If conception is derived, then can only be achieved by in vitro fertilization (IVF).

Yours faithfully,

**DR.KHISA WAKASIAKA**
